

**Amendments to the Claims**

Claims 1-18 (Canceled)

*sub 1* 19. (Currently Amended) A disposable garment, comprising:  
*C 3* a chassis including two front side panels and two back side panels each attached to an absorbent composite structure, the chassis defining two leg openings and a waist opening; and

a targeted elastic material in at least one of each of the front side panels and or at least each of the back side panels, the targeted elastic material of the at least each of the front side panel panels or at least each of the back side panels including a first high tension zone aligned with one of the two leg openings and a second high tension zone aligned with the waist opening, and a low tension zone between the first and second high tension zones, wherein each piece of the targeted elastic material is permanently bonded to and extends transversely beyond a linear side edge of the absorbent composite structure.

20. (Original) The disposable garment of Claim 19, comprising a diaper.

21. (Original) The disposable garment of Claim 19, comprising a training pant.

22. (Original) The disposable garment of Claim 19, comprising a feminine hygiene article.

23. (Original) The disposable garment of Claim 19, comprising swim wear.

24. (Original) The disposable garment of Claim 19, comprising an absorbent underpant.

Claims 25-29 (Canceled)

## Claims 30-33 (Withdrawn)

34. (Currently Amended) The disposable garment of Claim 19, wherein the targeted elastic material comprises a targeted elastic laminate including the low and high tension zones;

the low tension zone including a plurality of elastomeric first filaments, the first filaments including a first elastomeric polymer composition;

~~the each~~ high tension zone including a plurality of elastomeric second filaments, the second filaments including a second elastomeric polymer composition;

the laminate further including a facing material bonded to at least a first side of the low tension zone and a first side of ~~the each~~ high tension zone.

35. (Previously Added) The disposable garment of Claim 34, wherein the first filaments and the second filaments each comprise a base polymer selected from the group consisting of styrene-isoprene-styrene block copolymers, styrene-butadiene-styrene block copolymers, styrene-ethylene/butylene-styrene block copolymers, styrene-ethylene-propylene-styrene block copolymers, polyurethanes, elastomeric polyamides, elastomeric polyesters, elastomeric polyolefin homopolymers and copolymers, atactic polypropylenes, ethylene vinyl acetate copolymers, single-site or metallocene catalyzed polyolefins having a density less than about 0.89 grams/cc, and combinations thereof.
